About me

Full-Stack MERN Developer specializing in scalable backend architecture, high-performance systems, and real-time data processing, along with testing, debugging, and collaborative development. Experienced in designing repository-based backends, optimizing MongoDB queries, implementing Redis caching and message queues, and reducing API latency by 96%. Passionate about building production-ready, resilient, maintainable applications.

Technical Skills

- **Languages** : JavaScript (ES6+), TypeScript, C, Java
- **Frontend** : React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Context API, GSAP, TanStack Query
- **Backend** : Node.js, Express.js, JWT, OAuth, RESTful API Design ,
- **Database** : MongoDB, Mongoose, Aggregation Pipelines, Query Optimization
- **Tools** : Git, GitHub, Vercel, Postman, API Testing

Internship

1.Sheryians Private Limited, Bhopal

Full Stack Intern

Project: Recruitment Website

Live Preview

- Designed repository-based backend architecture with contract-implementation separation to improve maintainability and database flexibility.
- Optimized database performance by resolving N+1 query issues using MongoDB aggregation pipelines.
- Strengthened API security through request validation and rate limiting mechanisms.
- Decreased API response time (~3s to ~100ms) through Redis caching and message queue optimization.
- Contributed to secure authentication workflows by implementing a complete Forgot/Reset Password system with email-based verification and time-bound tokens.
- Developed scalable TypeScript frontend with modular architecture, Redux Toolkit state management, and Axios interceptors.
- Built a MERN-based Admin & Admin Job Dashboard managing 500+ applicants with RBAC, bulk processing, and an AI Test module with controlled enrollment, progress tracking, single-attempt validation, and 100+ test cases.

2. UV Netware Pvt. Ltd.

Backend Developer Intern

Project: Universal Seat Booking Platform

- Developed and maintained server-side applications and RESTful APIs..
- Contributed to backend architecture, database integration, and application logic..
- Collaborated with team members to deliver scalable and efficient software solutions.
- Applied analytical problem-solving skills to optimize backend performance and functionality.

Education

Sagar Institute of Research & Technology – Excellence, Bhopal

July 2023 – July 2027

B.Tech in Computer Science Engineering | CGPA: 7.6

Govt. Higher Secondary School, Chhatarpur

July 2019 – July 2023

Senior Secondary (12th): 85%

Secondary (10th): 75%

Projects

ShopMaster — Full E-commerce Store

[Live Preview](#) | [GitHub](#)

- Developed a full-featured e-commerce web application with product listing, filtering, and cart system.
- Implemented secure user authentication with two-step verification and session management.
- Integrated a secure payment gateway to provide a real-world buying and selling experience.
- Designed scalable product and order workflows. Tech Stack: MERN (MongoDB, Express.js, React.js, Node.js).

ResuInstant — AI Resume Builder

[Live Preview](#) | [GitHub](#)

- Built AI-powered resume builder enabling section-wise resume creation from scratch or upload of existing resumes.
- Implemented secure authentication and AI-driven content generation.
- Enabled real-time feedback from users for continuous resume improvement.
- Optimized performance and user experience across modules. Tech Stack: MERN, AI Integration.

Certifications

Full Stack MERN Development

Sheryians Coding School • Bhopal, MP • 2025
